03 PROJECTS

• Movie recommendation system

This project presents the development and implementation of a movie recommendation system that leverages machine learning techniques to predict and suggest movies tailored to individual user preferences

• Dairy farm management system

Our proposed project aims to build and manage a database that can be very beneficial for an insurance company. In the project, we intend to use the concepts involved in handling the data acquired from insurance companies, agents, and employees using MySQL and PHP.

I hereby declare that the above information is correct to the best of my knowledge and belief.
